Story

The lasca planet, one million years away from earth, has been extensively developed in science and has created robots that combine organisms and metals. These robots have begun slaughtering lasca people by driving out the lasca people and building their kingdom. Thus, the governor of the lasca planet sends the four survivors to a planet called the earth with a similar environment to the lasca planet. They were then ordered to reproduce themselves on earth and return to lasca to restore the lasca planet completely.

The four people who receive these orders start to live on earth by disguising themselves as an earthly family... will they be able to complete the mission and return? I am curious about what will happen to the lasca family who are going to live a life of deception.
